

Please be aware of how the telephone privacy act has improved the lives of hundreds of Hoosiers. Since its implementation we are no longer hounded by ever-more-aggressive phone solicitations. We are no longer interrupted EVERY dinner hour or wakened as late as 9:30 or 10:00 at night by unwanted calls. NO important calls have been eliminated, but the quality of our home life is 100% improved. Please do not reverse this ruling which has made such a difference. Also, consider the benefit to older Americans who are more easily duped and therefore fall victim to wiley sales pitches. They can't afford this kind of cheating! Thank you for your consideration.
